

23. (original) The method of claim 1 wherein the projecting step includes the further step of imposing a recording device dependent interference on the projected video content.

**IN THE SPECIFICATION:**

Please amend the paragraph beginning on page 9, line 2, as follows:

Video source material according to the principles of the invention can include the video content, entities that are incompatible with the video content, and the keys the projection system requires to render the entities imperceptible to a human during projection. The entities can also include artifacts that are incompatible with the video content. The entities can be any realizable image, including a unique watermark. The keys are selectively deliverable to those who are approved to show the video content. Selectively deliverable means that the content provider can control who receives the information required to remove the entities. Without the keys, entities that can be seen by a human will appear on the video content.
